

Experimental and Sport Aircraft

This program will look at the Certification, Operation and Maintenance of Sport Aircraft. We will discuss what a Experimental Amateur built is and what a Sport Aircraft is. The presentation will include aspects of certification, operation and maintenance of these aircraft. The participants will look at case studies of accidents to learn about transitioning to these aircraft.

Directions: The program will take place at Wisconsin Aviation on the Watertown Municipal Airport.

A message from the National FAASTeam Manager

The new WINGS–Pilot Proficiency Program is great! Check it out now!
